CTI Clinical Research Associates Rated Excellent by Sites for 9th Year in a Row

CTI Clinical Research Associates Rated Excellent by Sites for the 9th Year in a Row

Successfully executing any project requires a team of individuals who are dedicated and hardworking. Adequately completing complex clinical trials involving critically ill patients requires a team of individuals who are also attentive to detail, efficient, communicative, and highly-experienced with unparalleled therapeutic expertise.

At CTI, our global clinical monitoring model is built around the philosophy of providing such teams to our sponsors.

Clinical Research Associates (CRAs) have significant experience working with complex studies and critically ill patients. Our staff has decades of experience in research and nursing outside their CRA experience, and with an average annual employee retention rate of 95% over the last 5 years, our CRAs are able to see their studies from start-up through close-out.

In addition to a rigorous hiring process to ensure we only hire the best CRAs to join our team, CTI also conducts an annual CRA survey to ensure the highest level of quality.

This year's survey was directed to nearly 300 Study Coordinators that currently work with or have worked with CTI CRAs in the past year. Feedback was solicited in the form of 8 questions, several of which asked the coordinators to rate the CRA from 1 to 5 (5 being excellent and 1 needs improvement) on various attributes including:

- Protocol/Therapeutic Knowledge
- Ability to Collaborate
- Responsiveness
- Overall Performance

The Results: Consistently Excellent

Over the last 9 years, CTI CRAs received an average rating of:
(scale of 1 to 5 with 5 being the highest score)

"XXX is personable, professional with extremely strong work ethics. I have been involved in clinical research for 21 years and she is by far the most dedicated monitor I have ever had. She works long hours, pays close attention to detail and willing to work with the coordinator. I feel that XXX considers our site a team as it is a team effort between XXX and XXX which is extremely important. XXX goes above and beyond in my opinion."

"XXX exceeded our expectations with every interaction. Her requests and directions were always clear and timely. She guided us through an unexpected and challenging turnover of study coordinators with certainty and clarity. She went above and beyond to help the new coordinator feel confident in the protocol and procedures. When we had a sponsor audit, XXX and her manager made themselves 100% available to us as we prepared. I cannot recommend XXX highly enough. I know any site will be lucky to have her."

recommending XXX to be CRA for other sites or studies and would love to be able to work with her on another study in the future.”

Additional Highlights

Upcoming Meetings We'll be Attending

WORLD Symposium

San Diego, CA
February 5-9

BMT Tandem Meetings

Salt Lake City, UT
February 21-25

AST, Cutting Edge of Transplantation 2018

Phoenix, AZ
February 8-10

Rare Disease Desert Symposium Conference

Tucson, AZ
February 26-27

OCT West Coast

Burlingame, CA
February 21-22

EBMT Conference

Lisbon, Portugal
March 18-21

German Cancer Congress

Berlin, Germany
February 21-24

Join Our Team!

We are currently seeking qualified individuals to join our team!
