

CTI Employees are Life-Changing Examples for All

Greetings,

As we begin our 19th year in business, I would like to take this opportunity to highlight the CTI employees. Here at CTI, we are celebrating "The Year of Extraordinary" and I can tell you, I've never seen a more extraordinary group of individuals than our team. While many of you work with our team day to day on complex clinical projects, there is something that makes our team the best in the industry - their passion and commitment to others. Our team not only dedicates hours of their time to projects in the office, but they also donate countless time and financial support to charitable organizations.

Giving back has always been a large part of CTI. We've seen first hand how limited research funding can be a major obstacle, how illness and medical costs can wreck families, and how local/regional/national health crisis can impact countless lives. CTI Cares was established as a program several years ago, in response to the great interest of our employees who want to give back to society, and in part due to the prior success we had in charitable giving programs. Under this program, all employees have the opportunity each month to nominate a charity/special cause near to them. CTI Cares is a way for CTI employees to raise awareness and raise financial contributions for the causes they personally feel passionate about. The employee who submitted the selected CTI Cares project will have the opportunity during the month to spotlight their charity throughout the company, raise awareness and educate other employees, and receive a contribution from CTI in addition to the money they raise.

CTI is committed to helping those in need, especially in communities and areas directly related to our employees, sponsors, and partners. This year alone, CTI employees have chosen to spotlight, among

CTI Cares Spotlight:

Each year, between 140 and 160 officers are killed in the line of duty and their families and co-workers are left to cope with the tragic loss. C.O.P.S. provides resources to help them rebuild their shattered lives. There is no membership fee to join C.O.P.S., for the price paid is already too high.

C.O.P.S. was organized in 1984 with 110 individual members. Today C.O.P.S. membership is over 47,000 survivors. Survivors include spouses, children, parents, siblings, significant others, and affected co-workers of officers killed in the line of duty according to Federal government criteria. C.O.P.S. is governed by a National Board of law enforcement survivors. All programs and services are administered by the National Office in Camdenton, Missouri. C.O.P.S. has over 50 Chapters nationwide that work with survivors at the grass-roots level.

Nominated by:
Lisa Kaffeneberger, Senior Travel Coordinator

Cancer Institute, which a CTI biotechnology partner was participating in; the John G. Carlilse School, which is down the street from our new global headquarters in Covington, Kentucky; and multiple organizations in areas we're working, including the Fanconi Anemia Research Foundation, the Children's Organ and Transplant Association, and the Gift of Life Family House.

As a way to celebrate a milestone birthday last month, CTI employees around the world donated their time and money to random acts of kindness in my honor. I was flabbergasted by their creativity, generosity, and overwhelming compassion for others. This truly highlights the positivity and caring that come from this team throughout the world on a daily basis.

To the CTI Team - You are extraordinary, truly changing lives every day. I am honored to work with you and am humbled by the responsibilities that occur because of this. A simple thank you is not strong enough to show the gratitude for all that you do for me, our pharmaceutical, biotechnology, and medical device partners, the academic research centers we work hand in hand with, and most importantly, the patients. Your dedication and hard work in the face of incredible challenges is awe-inspiring. I feel extremely fortunate to call you both friends and colleagues.

At CTI, we're focused on contributing to making life-changing therapies available for patients, but kindness, caring and generosity, like that of our employees, can also be life-changing, and can help make this world a better place.

Best,

Tim Schroeder, Founder and CEO
